First of all:

- One
- Two
- Three

Strikeout text can be used as comments:

Self citations are of course the best [2, 3]. Citations work well with paperpile. User Paperpile to format the bibliography in the preferred style.

2 Formatting

Use internal links to refer back to other sections, see Sec. . To this end, select “Link” and then “Headings and Bookmarks” to select the right section.

Latex code can be embedded directly if needed, though escaping of special characters will often interfere: $\int _a^b f(x) dx$.

Inconsistent formatting doesn't matter. Only **bold** and *italics* are converted.
